Module 1: VSP Fundamentals
- VSP geometry, survey planning
- Acquisition - sources and tools
- Time/depth, velocities, well ties and seismic integration products
- Seismic While Drilling and Distributed Acoustic Sensing (DAS)

Module 2: Advanced Imaging
- Advanced 2D and 3D imaging

Module 3: Anisotropy & More
- VTI and HTI anisotropy, AVO/AVA, fracture detection

Module 4: Reservoir Properties
- Time-lapse (4D) studies
- Crosswell seismic
- Introduction to microseismic
- Inversion for elastic properties

Modular format can be customized to suit customer needs
- Choose between modules to fill training needs
- Choose between module components to fit available time
